

COMPANY PROFILE

Baroda Global Impex

Global Specialists in Scientific and Industrial Glass Solutions...

**FORGED IN GLASS.
BUILT FOR INDUSTRY.**

Served by BARODA GLOBAL IMPEX...

Brand We Serve: BGI BOROCORE – Forged in Glass. Built for Industry.

*Looking ahead, we see opportunity — with you.
Your vision. Our expertise. One future...*

About Us

Baroda Global Impex (BGI) is a globally trusted name in the supply and creation of scientific and industrial glass systems. Operating under our flagship brand **BGI BOROCORE**, we have earned a solid reputation as a leading dealer and project partner in glassware, glass process plants, glass assemblies, and specialized glass apparatus.

Our brand philosophy —

"Forged in Glass. Built for Industry."

defines our dedication to delivering robust, precise, and dependable glass solutions tailored to the diverse needs of laboratories, industries, and research organizations worldwide.

While we do not manufacture products ourselves, we work in close collaboration with renowned global manufacturers and engineering partners to supply world-class glass products and systems that meet international standards of quality and performance.

Our Brand – BGI BOROCORE

BGI BOROCORE symbolizes our commitment to strength, precision, and reliability.

BOROCORE represents our focus on premium borosilicate glass technology, known for durability, clarity, and chemical resistance.

Forged in Glass reflects the craftsmanship, integrity, and excellence behind every product we supply.

Built for Industry emphasizes our mission to serve industrial and scientific sectors with high-performance glass systems designed for real-world applications.

Our Mission

To deliver dependable, high-quality glassware and process systems to industries and research institutions across the globe through trusted sourcing, technical expertise, and exceptional customer service.

*Looking ahead, we see opportunity — with you.
Your vision. Our expertise. One future...*

Our Expertise

Baroda Global Impex deals in and supports the creation of:

- **Industrial & Laboratory Glassware** – Premium-quality glass products for laboratory and industrial use.
- **Glass Process Plants** – Design, assembly, and supply of glass-based process systems for industrial applications.
- **Glass Assemblies** – Modular glass setups and custom-built systems engineered to precise specifications.
- **Glass Apparatus** – Specialized instruments for scientific, analytical, and experimental operations.

Our Product Portfolio

We specialize in the design, manufacturing, and supply of high-quality scientific and industrial glass process systems. Our product range covers a wide variety of laboratory, pilot plant, and production-scale equipment used in chemical, pharmaceutical, and research industries.

Standard Units Product Range

1. Glass Reactor with Metal Jacket

– Designed for efficient heating/cooling and reaction control with corrosion-resistant glass interiors.

2. Simple Distillation Unit

– Ideal for separation and purification of liquid mixtures through controlled distillation.

3. Reaction Unit

– Compact and modular system for chemical synthesis and process development.

4. Fractional Distillation Unit

– Used for precise separation of components based on boiling points; suitable for laboratory and pilot applications.

5. Reaction Distillation Unit

– Combines reaction and distillation processes in a single setup for integrated operation.

*Looking ahead, we see opportunity — with you.
Your vision. Our expertise. One future...*

6. Liquid–Liquid Extraction Unit

- For solvent extraction and phase separation processes in research and production.

7. Solid–Liquid Extraction Unit

- Used for extraction of soluble components from solids using solvent systems.

8. Assembly Over GLR (Glass Lined Reactor)

- Customized glass assembly mounted on glass-lined reactors for hybrid operation.

9. Gas Scrubber

- Designed for effective absorption and neutralization of corrosive or toxic gases.

10. Multi-Purpose Unit

- Versatile modular setup adaptable for various chemical and pharmaceutical operations.

11. Mobile Mixing System

- Skid-mounted portable mixing unit for liquid blending and transfer applications.

12. Essential Oil Distillation Unit

- For extraction of natural oils and essences from plant materials.

13. Lab Glass Reactor

- Compact reactor for R&D and laboratory-scale process trials.

Quality Assurance

Quality is the foundation of everything we do. We ensure that all our glassware and systems are sourced, assembled, and inspected according to international benchmarks for performance, safety, and precision. Our technical team ensures each project meets the highest standards before delivery.

Global Reach

With established partnerships and representation across world-wide Baroda Global Impex has built a strong international presence as a dependable dealer and solutions provider in the field of glass technology.

*Looking ahead, we see opportunity — with you.
Your vision. Our expertise. One future...*

Industries We Serve

- Chemical & Petrochemical
- Pharmaceutical & Biotechnology
- Research & Education
- Food & Beverage
- Environmental & Analytical Laboratories
- Industrial Manufacturing

Why Choose Baroda Global Impex

- Trusted dealer and global supplier of scientific and industrial glass systems
- Partnerships with leading glass manufacturers and engineers
- Customized glass process plants and assemblies
- Reliable worldwide logistics and after-sales support
- Commitment to quality, integrity, and innovation

*Looking ahead, we see opportunity — with you.
